📍 Lajkovac, Serbia

### Summary

---

Senior Software Engineer with over 6+ years of experience building up JavaScript Web applications and infrastructure for several organizations. Designed, built and maintained reusable, reliable and efficient Node.js code and ensured best performance, responsiveness and quality applications as a blue & white skilled JavaScript and Java engineer for a long time. Highly experienced, solutions oriented professional in overseeing all aspects of the SDLC from extensive analysis and design through deployment and maintenance, Agile environment, DevOps and Team collaboration. Creative, Result-focused, Passionate & Self-Learner. Keep curious and ahead about new technologies.

### Professional Experience

---

#### Software Engineer

Apr, 2025 - Mar, 2026 **Accenture** (United Kingdom)

- Built scalable backend services with **Java** and **.NET**, creating **RESTful APIs** and implementing data processing algorithms to handle large-scale datasets and **ETL** pipelines.
- Worked with **Node**, **Python** and **Golang** drivers to perform operations such as operations and writing complex queries with **PostgreSQL**, **MySQL**, **Redis**, **CRUD RabbitMQ**.
- Contributed to the implementation of Microservices architecture company project using **.NET Core** and **Java Spring Boot**, enhancing scalability and maintainability.
- Collaborated with 5 **backend** engineers to improve the efficiency by **20%** using **GraphQL**.
- Built scalable backend services with **Java** and **.NET**, creating **RESTful APIs** and implementing data processing algorithms to handle large-scale datasets and **ETL** pipelines.
- Developed and maintained robust and scalable **.NET** and **Java** applications using industry best practices and coding standards.
- Implemented automated testing strategies using **Jest** for **React** applications and **MSTest/NUnit** for **.NET** services, achieving **65%** test coverage and reducing bug reports by **30%**.
- Implemented **OAuth** and **JWT** for **API** authentication and authorization in **.NET** and **Java backend** services, enhancing security and user management.

#### Full Stack Web Developer

Apr, 2022 - Feb, 2025, **Vega IT** (Serbia)

- Designed and maintained enterprise web applications and internal business solutions using **.NET Core**, **React**, **Node.js**, and **SQL** technologies.
- Supported migration and modernization projects for legacy systems and business platforms.
- By utilizing a **React frontend** and a **Java backend**, we integrated distributed **network** data from various applications into a centralized web portal, reducing access speed to critical data by **20%**.

- Reduce loading time by **30%** using avoiding unnecessary renders, optimizing assets, **SSR** or Caching for the **frontend**.
- Developed secure **RESTful APIs** and integrated **third-party** services for internal and customer-facing systems.
- Developed enterprise data integration platforms using **React** and **TypeScript, Node.js** implementing complex data visualization components and interactive dashboards for clients.
- Using **Java**, developed a search engine, a **Node.js RESTful API** for data access, and a **React** web frontend for searching and managing search results, thereby implementing a fast configuration regex search function.
- Participated in **React + .NET** project and developed a testing plan and automated testing for the entire project, achieving a test coverage of over **90%**.
- Utilized **Azure DevOps** for source control, release management, and work item tracking.
- Utilized **SQL** and **ORM** frameworks (such as **Entity Framework** and **Hibernate**) to implement efficient and secure database interactions.

## Web Developer

Sep, 2020 - Mar, 2022, **Getronics** (Netherlands)

- Worked with **PHP** and **Laravel** to build simple backend features and handle data.
- Converted **UI/UX** mockups to React screens and components with **Bootstrap** and **Tailwind CSS**.
- Worked with **React** and **Node.js** to build simple **frontend** and **backend** features and handle data.
- Developed three mobile with **IOS** and Java consumer apps (**native, Swift**) in the mindfulness space.
- Switched the backend from **MySQL** to **MongoDB** to improve scalability and performance as user data and transactions grew.
- Built a **React** and **Java, MongoDB** component to track employees working time, vacation, and sick days.
- Developed and maintained web-based business applications using **React, Node.js, PHP**, and **Laravel**.
- Assisted with system migration and infrastructure enhancement projects.
- Created reusable **frontend** components and **backend** modules for internal enterprise tools.
- Worked with **cloud-hosted** databases and services to improve scalability and reliability.
- Participated in troubleshooting, **bug fixing**, and enhancement delivery for production systems.
- Built employee management and tracking systems using **React, NestJS**, and **MongoDB**.
- Collaborated with cross-functional teams to ensure successful delivery of technical solutions.

## Education

---

### Bachelor's degree in Computer Science

Apr, 2016 - May, 2020, **University of Belgrade** (Serbia)

## Skills

---

HTML5 / CSS3 / JavaScript / TypeScript / Angular / React / Vue / Next.js  
 Express / Node.js / Nest.js  
 PHP / Laravel / WordPress / Shopify / Magento  
 Python / Django / Go / Rust / Ruby / FastAPI  
 Java / Spring Boot / Spring Security  
 MongoDB / MySQL / PostgreSQL / Oracle / Microsoft SQL Server Redis / Firebase  
 Prisma / Sequelize / TypeORM / Mongoose / Hibernate / Eloquent  
 AWS / Jenkins / GitLab / Docker / Kubernetes / Azure DevOps / CI/CD / Microsoft Azure
